

SHRAVU: STRATEGIC COMPETITIVE COMPARISON (2026)

Permission-Layer Communication Platform vs Traditional Messaging & Social Apps

FEATURE CATEGORY	WHATSAPP (PRIVACY KING)	TELEGRAM (USERNAME SHIELD)	INSTAGRAM/SNAPCHAT (SOCIAL SPHERE)	GMAIL/EMAIL (PROFESSIONAL HUB)	SHRAVU (PERMISSION LAYER)
Primary Identity	Phone Number	Username / Phone	Handle (@user)	Email Address	✔ Temporary Code
Discovery Model	✘ Permanent (Once shared, forever)	✘ Permanent (Usernames don't expire)	✘ Permanent (Profile is public/linked)	✘ Permanent (Email in databases)	✔ Ephemeral (The "Door" moves daily)
Data Leak Risk	✘ High (Numbers sold to spammers)	⚠ Medium (Usernames can be stalked)	✘ High (Linked to life/photos)	✘ High (Professional identity risk)	✔ Zero (Used codes are worthless)
Connection Control	⚠ Awkward Blocking	⚠ Blocking (ID still exists)	⚠ Restricting/Blocking	⚠ Spam Folder (Still arrives)	✔ Breaking Connection (Clean ghosting)
Code System	✘ None	✘ None	✘ None	✘ None	✔ Flash / Service / Permanent Codes
Usage Limits	✘ No Control	✘ No Control	✘ No Control	✘ No Control	✔ Usage Counter (e.g., 2 connections max)
Social Baggage	⚠ DP, Status, Last Seen	⚠ Username History	✘ Full Life Album (Photos/Location)	⚠ Professional History	✔ Clean Slate (Only what you share)
Connection Lifespan	✘ Permanent (Until blocked)	✘ Permanent (Until blocked)	✘ Permanent (Until blocked)	✘ Permanent (Forever in inbox)	✔ Contextual (Service-based termination)

Legend: ✔ Full Feature | ⚠ Limited/Partial Feature | ✘ Not Available or Inferior

🎯 **Unique Advantages:** Zero-CAC Model • Daily Flash Codes • Usage-Counter Codes • Clean Break Mechanism • Context-Based Channels • Ephemeral Identity • Direct Business Portal • Retroactive Chat Wipe

💡 **The Only Platform Offering:** True Data Kill-Switch • Permission-Layer Communication • Self-Destructing Digital Bridges
